

Leading eDiscovery Company Introduces FirstLook™ via Webinar!

A Cost-Effective and Reliable Workflow Module Targeting Early Case Assessment

MOUNTAIN VIEW, Calif. – Advanced Discovery, a leading provider of investigatory and litigation services for Corporations and Law firms worldwide, is pleased to announce a webinar highlighting FirstLook™, an accurate and cost-effective Early Case Assessment and Analysis Workflow Module.

Commercial Litigation Attorneys, Litigation Support Managers, and Corporate Counsel are invited to join in this exciting webinar. Brian Kawasaki, Executive Vice President for Advanced Discovery and a Relativity Certified Administrator and workflow design expert will conduct the webinar.

“FirstLook™ provides our clients a reliable workflow to analyze their data quickly and cost-effectively,” said Brian Kawasaki, “FirstLook™ provides improved workflow and also brings reliable and cost-efficient results while effectively applying advanced iterative technologies. These technologies include concept clustering, email threading and near duplicate detection all within one application, Relativity.
